Restriction/Election

1. Restriction to one of the following inventions is required under 35 U.S.C. § 121:
 - I. Claims 1-13, drawn to an interactive audio device, classified in Class 381, subclass 1+.
 - II. Claims 14-21, drawn to eyeglass with interactive audio device supported by frame and the lenses have variable light attenuation, classified in Class 351, subclass 158.

The inventions are distinct, each from the other because of the following reasons:

Each of the invention, I and II, recites limitations not recited in any of the other invention. The differing limitations make the inventions I and I patentably distinct from one another, i.e. a reference that anticipates or makes obvious one of the inventions I and I would not, by itself, anticipate or make obvious any of the remaining invention.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.
